

MGBGTV8 spotted in France by the Millau bridge

Bob Grieves says "Gill and I have just returned from a holiday in France and Spain and we spotted this MGBGTV8 on tour at the viewing point for the Millau bridge. The French bought it as a right hand drive rubber bumper 1975 (Harvest Gold 2414) with black trim. The current owner has modified it to LHD and fitted chrome bumpers and the wrong chrome grill and badge!" Have looked for it on the V8 website but it is not registered." The V8 Registrar has recorded it now!
