

Private sale – Exceptional low mileage UK Spec RV8

Nightfire Red 1129 was purchased from Sargeant & Collins of Bromley, Kent on 3rd August 1994 specified with Birds Eye Maple Walnut instead of Elm Burr and with additional rust proofing applied underneath and in the box sections by Ziebart Limited. The two previous owners have cherished the car and with a recorded mileage of only 8,380 miles the car has seen very light summer use and the paintwork is perfect in every way. The roof and engine bay are in as new condition and the leather interior and the wood trim are all immaculate. The car is totally standard with the exception of the following, the speakers have been upgraded to JBLs, the stereo upgraded to a red display Becker Grand Prix which has Bluetooth phone and iPod connections, and a Burr Elm gear knob upgrade - all the original items have been retained.

Original tool roll with all tools, torch and battery strap. Unused jack and wheel chock together with half tonneau including rare red hood cover used by factory to protect roof when transporting cars. Service history with invoices and all MOTs to support mileage, two owners handbooks with wallets, service books, untouched marketing brochures, parts books, overhaul manuals, anniversary articles, magazines, V8 badges, MG badges, original factory order, etc.

Documentation also includes the owner's Portfolio Wallet (yes the rare one) with appropriate marketing brochures, two original leather RV8 Key Fobs (again the rare ones) the David Knowles MG V8 book and finally the original purchase invoice for the car. The screen surround is rust free and has been protected. The car has always been garaged from new, two sets of keys with alarm fobs. MOT to April 2012, Tax to March 2012. This is a much cherished car which is reflected in its excellent condition. **Price £16,750 ono** 040711
