

Removable luggage rack for an MG RV8

Removable luggage rack

Chris Yates has sent in a set of photos of his removable luggage rack saying "it's a removable SS rack which was originally fitted to my RV8. It does not require any drilling and is held in place by clamps to the side and leading edge of the boot lid. As these are not adjustable, I assume that the whole rack was designed to fit the MG lid. Offers invited!"

Fixed luggage rack

Chris says this luggage rack is fixed to the boot lid of his RV8 and adds "my RV8 is still in 'winter' mode so in addition to photos taken in the garage today, I have added one taken on last year's Caledonian run. The dimensions of the rack are 77cm x 40.5cm and the supporting brackets are 60cm."
