

Windstopper for an MG RV8

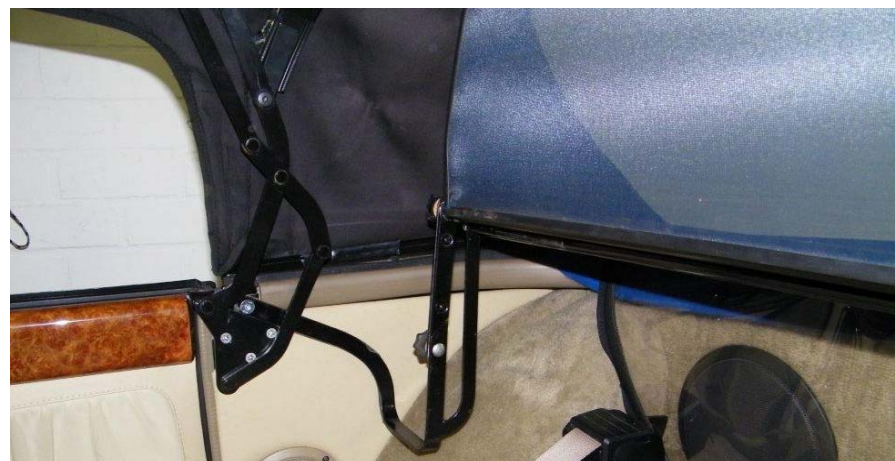

Photos of a windstopper from a Dutch RV8 enthusiast Leo Schetters who has generously made a set of drawings available to fellow enthusiasts through publication by the V8 Register – MG Car Club. This windstopper incorporates a neat folding mechanism which enables the windstopper screen to be lowered when necessary.

Windstopper for an MG RV8

The half tonneau fits easily around the windstopper brackets when the flat section of the tonneau is dressed down behind the seats.

The folding windstopper installation fits inside the hood when raised.
