

News from Australia of the last chrome bumper MGBGTV8

David Hope from Australia was at MGLive! 2012 and has since been in contact to say he has the last chrome bumper MGBGTV8 and is about to undertake some restoration work. He says "Citron 1956 came to Australia in 2007. It has only travelled 59,000 miles and I believe is very original. Due to its historic interest I would like to keep it as original as possible and avoid a bare metal rebuild but to bring it up to a high standard of repair and presentation. Work should start soon."
