

## Robert MacGillivray gets a good looking V8 Roadster

Robert MacGillivray reports that "at the weekend I was up in Avoch and bought a V8 Roadster which was built in 1997/98 using the mechanical bits from an MGBV8GT into an American MGB Roadster shell by Graham Barker of Melrose in the Borders. He sold it in 2003 to Alistair Todd from whom I bought it. It is really good with all the right bits! I bought it to resell but its so good I'm very tempted to keep it! But to do that I'd need to sell my MGBGT V8 (Citron 0798) the Earls Court Motor Show car! Decisions, decisions!" This V8 Roadster had not been registered earlier with the V8 Register. (22.2.10)
