

### Next restoration project for David Smith

After restoring an MGBGT V8 to an immaculate condition finished in the relatively rare original Factory body colour Aconite, I sold the car to Tom Fallon who is delighted to be the new owner of a wonderful example of the model. Now I am setting off on a new MGV8 conversion and restoration

MGB Roadster waiting for the V8 conversion

project – converting a rubber bumper MGB Roadster to an MG V8 Roadster. At the moment I am stripping the donor car and selling bits to help fund the Roadster refit.

Donor car

As the project progresses I will do the write up with photos illustrating the work involved and describing key stages – for example fitting engine mounts for the V8 engine, a topic which has featured in a recent thread on the V8 Bulletin Board.
