

## MGBGTV8 (Tundra 0869)

Longstanding V8 Register member, Roger Drake in Hampshire, recently ordered updates for his set of V8 Workshop Notes. On completing the download provided by WeTransfer (a leading easy to use digital files online delivery system), Roger sent in a few photos of his original chrome bumper MGBGTV8. He bought the car from a fellow V8 Register member in 2001 who had kept the car in a wonderful condition with a restoration and some useful upgrades, not least the good quality leather seats and trim and front spoiler. New carpets were made by a carpet specialist in Midhurst, a market town in West Sussex. Only 59 chrome bumper MGBGTV8s left the MG Factory finished in Tundra and later also 33 rubber bumper models - together only 3.54% of the MGBGTV8s produced at Abingdon.

How to get updates for your set of workshop notes. [Link](#)
